

If you need more resources...

This fact sheet lists resources that may help you. The Internet can provide breast cancer information as well. Make sure the information is reliable and trustworthy. Ask these questions: Is the source reputable? Is the source affiliated with a university, health organization or government agency? Before you take any action based on something you find on the Web, talk with your health care provider. Get at least one other opinion, then decide what is best for you. The list below includes suggested resources, but is not a complete listing of breast cancer organizations or information.
